

EZ *Task Inventory Software*

With the **EZ-Task Inventory Accounting System**, those long hours spent taking and extending inventory become a thing of the past. Inventory time is cut dramatically and time spend extending inventory is eliminated completely. Combine that with cost of goods, inventory level, item usage, suggested reorder, commodity item cross references and other system reports and its easy to see why this system is the best.

The **EZ-Task Inventory Accounting System** is actually a complete line of fully integrated software modules; each designed to perform a specific type of school food service management function. This module design gives you freedom of choice, to build at system at your own pace, with the features you want, at a price you can easily afford. Because you choose the features and capabilities, which are appropriate for your operation, you avoid the high cost and inefficiencies of built-in features that will never be used.

EZ-Task's Inventory Accounting System modules are designed to operate as a stand-alone program, **EZ-Task Basic**, or with the multi-user version, **EZ-Task Plus**, you can run over a wide-area network, providing you with the flexibility required in today's business environment.
